

Prakhar Srivastava

Stony Brook, NY | +1(631)428-7337 | prakhar.srivastava054@gmail.com | [linkedin.com/in/prakhar45srivastava](https://www.linkedin.com/in/prakhar45srivastava) | prakharsri45.github.io

Education

Stony Brook University

Master of Science, Computer Engineering - 3.42 GPA

- Relevant Coursework: Computational Models, Embedded Systems, Modern Sensors in AI Apps, Image Processing, Principle of Programming Languages.

Stony Brook, NY

Expected May 2022

DIT University

Bachelor of Technology, Electrical Engineering

- Relevant Coursework: Operating Systems, Engineering Mathematics, Wireless Communication.

Dehradun, India

July 2013 – May 2017

Skills

Languages: Python, C/C++, MATLAB, JAVA, HTML/CSS/JS, Proteus design, AutoCad, Labview

Databases/Frameworks: MySQL, MongoDB, Flask

ML Libraries: Pandas, NumPy, Matplotlib, Selenium, BeautifulSoup, Scikit-learn, OpenCV, PyTorch, Keras, TensorFlow

Tools/Operating Systems: PyCharm, Jupyter, Google Colab, IntelliJ, VS Code, Git, Linux, Windows

Hard Skills: Research, Problem Solving, Time Management, Database management, Teamwork and Collaboration

Experience

Solera Life Sciences Pvt Ltd.

Python Developer Intern

Delhi, India

Oct 2020 – Jan 2021

- Built scripts for the website (www.cbdbene.com) to visually examine the web-page errors and helps to debug the responsiveness of the website using **Selenium**, **BeautifulSoup**, **Pandas**, and **Numpy**.
- Created scripts to automate update of data files on company website and customized it as seen from a mobile phone with all the formatting of the pages using **Selenium**, **Pandas**, and **Numpy**.
- Designed and ran scripts and queries to retrieve data by developing views and managing client databases using **MySQL**.

Monteage Technologies Pvt Ltd.

Electrical Engineer

Delhi, India

Jan 2018 – Sep 2020

- Focused on clients structural real-time needs in the technology sector of Barcode, RFID, GPS, CCTV, LED Components and Smart Education System.
- Authorized work instructions to define user provisioning and file uploads, improvised a work which result to 80% reduction in time taken for the large-scale user provisioning.
- Implemented the contouring method for cleaning and processing thermal images captured using FLIR camera in **MATLAB**.
- Evaluated a semi-analytical technique in **MATLAB** to generate a homogeneous magnetic field for rectangular and circular coils.

Hind Rectifiers Ltd.

Electrical Engineer

Dehradun, India

July 2017 – Jan 2018

- **Quality Control(QC)** engineer followed Six Sigma for secure and efficient computing-based technologies using **MATLAB**.
- Monitored and inspected the quality of high voltage transformers, multiplexers and converters before the production began.
- Verified by writing a program and model the system in **MATLAB** which provided a platform to evaluate and enhance the stability, reliability, and integrity of real-time functioning of the system.

Projects

Comp-GAN Recommended System – Python, TensorFlow

Jun 2021 – Aug 2021

- Advised by Professor Alex Doboli - Research Project: Generative model used for adversarial minimax game and trained two models, generative and discriminative model.
- Captured the data distribution of laptops, and estimated the probability for the recommendation system.

Generate Colorcode – Python, Matplotlib

Feb 2021 – May 2021

- To reduce the redundancy in selection of colors for website making, project, blogging, newsletter and online graphics.
- Built a program that takes Input color name and generates RGB, HSL, and Hex code with the respective code in a plot.

Automate Board Game – Python, Matplotlib

Feb 2021 – May 2021

- Program the playing of a board game, where board is an object and players are distributed processes, written in **DistAlgo**.
- A board object can encapsulate a representation of board, moves, winning, drawing criteria, and the show of a board.

Pandemic Trajectory – Python, Openpyxl, Xlsxwriter, Json

Jun 2020 – Aug 2020

- Built a script to extract data from **json** file from a government website to showcase data of COVID-19 current scenario in a file with graphs, diagram and trajectories to visually analyse daily cases with physical recordings.

Internet Of Things Controller – Arduino IDE, C++

Jan 2017 – May 2017

- Built a prototype to control the hybrid energy system using ESP8266 wifi-module and programmed in **C++**.
- Internet Of Thing helps to switch the power supply between wind energy and solar energy of a house through secure website when the grid supply is off. [Google Scholar](#)
